

With so many adhesives and sealants to choose from, do you have time to read what each one does?

So what is the Solution?

THE STRONGEST SEALANT ADHESIVE ON EARTH!

Take one to learn more!

Fixes, Bonds and Seals everything to everything

DEREK BOYER
Australia's Strongest Man -
undefeated in every
competition in Australia since
1997!!

T-Rex Power Bond contains NO SOLVENTS, NO TOXIC CHEMICALS and it is ODORLESS. With its outstanding properties it can be used as a SEALANT or an ADHESIVE. It has a very high initial grab which makes bonding tile, stone or slate vertically a breeze! T-Rex Power Bond is water resistant for indoor and outdoor use; it will even bond to wet surfaces! T-Rex Power Bond will not shrink or crack and is paintable/stainable. With incredible strength and flexibility, it can be used in concrete joints. Do not be fooled by other products that claim to be an all-in-one multipurpose product, experiment for yourself!

DARE TO COMPARE??

- Place water-based products in water and watch them dissolve!
- Try using a construction adhesive as a sealant!
- Have you noticed how much a gap filler shrinks and how limited it is for flexibility?
- Can you paint a Silicone?
- Read the contents of Polyurethane and decide how safe it is for your health.

You will find that all other products have limitations!

T-Rex vs. the rest

THE STRONGEST SEALANT ADHESIVE ON EARTH!	<i>T-REX</i>	All-Purpose grab adhesives & similar	Liquid construction adhesives & similar	Silicone sealants	Polyurethane sealants
